

Assignment-7

PROBLEM STATEMENT :

Hosting a website on EC2.

Steps to host a website on EC2->

1. Sign up for an AWS account, search for 'EC2' then click on it.

2. Click on 'Launch instance'.

3. Fill up the required details->'Name' and under 'Application and OS Images' select 'ubuntu'.

In key pair(login)', click on 'Create new key pair', give 'key pair name' and create it. Under 'Network Settings' tick on all checkboxes. Launch instance.

4. Instance is created successfully. Then click on 'Instances' .

5. Click on 'Public IPV4 address' & copy it then open 'Bitwise SSH Client'

6. In Bitwise SSH Client, paste the 'Public IPV4 address' 7 click on 'Client key Manager'.

7. Under 'Client key manager', if there is any existing key then remove it and click on 'Import', select the created key then again click on 'Import' and then the key is successfully imported.

8. In 'Bitvise SSH Client', under 'Default profile' give the 'Username' as 'ubuntu' then select Global1 from 'Client Key Manager' then click on 'Log in' & 'Accept and save'.

9. In 'Bitvise SSH client', under 'Default profile' click on 'New terminal console' and there run 'pwd' command to check where we are.

```
ubuntu@3.88.206.65:22 - Bitvise xterm - ubuntu@ip-172-31-19-43: ~
To run a command as administrator (user "root"), use "sudo <command>".
See "man sudo_root" for details.

ubuntu@ip-172-31-19-43:~$ pwd
/home/ubuntu
ubuntu@ip-172-31-19-43:~$
```

In terminal console, type the following commands.-> 'sudo apt-get update', 'sudo apt-get upgrade', 'sudo apt-get install nginx'.

```
ubuntu@ip-172-31-19-43:~$ sudo apt-get update

```

-
- The screenshot displays a Windows 11 desktop environment. A terminal window is open, showing the following content:
- ```

System load: 0.0 Processes: 106
Usage of /: 29.9% of 6.71GB Users logged in: 0
Memory usage: 24% IPv4 address for enX0: 172.31.45.122
Swap usage: 0%

Expanded Security Maintenance for Applications is not enabled.

9 updates can be applied immediately.
9 of these updates are standard security updates.
To see these additional updates run: apt list --upgradable

Enable ESM Apps to receive additional future security updates.
See https://ubuntu.com/esm or run: sudo pro status

*** System restart required ***

```
- The desktop background is a Windows 11 wallpaper. The taskbar at the bottom shows various application icons, including the Start button, Search, and several pinned applications. The system tray on the right shows the date and time as 06-03-2025 and 12:30.

- 
- The screenshot displays the Bitvise SFTP client interface. The top menu bar includes 'Window', 'Local', 'Remote', 'Upload queue', 'Download queue', and 'Log'. Below the menu, there are buttons for 'Browse', 'Upload queue', 'Download queue', and 'Log'. The main area is divided into two panels: 'Local files' and 'Remote files'. The 'Local files' panel shows the directory 'C:\Users\USER\Downloads\life-insurance-website-template\NEW' with a table of files: 'index.html' (412 bytes, Microsoft Edge, 06-03-2025 11:19) and 'login.html' (316 bytes, Microsoft Edge, 06-03-2025 11:03). The 'Remote files' panel shows the directory '/var/www/html' with a table of files: 'index.html' (412 bytes, Microsoft Edge, 06-03-2025 11:19), 'index.nginx-debian.html' (615 bytes, Microsoft Edge, 06-03-2025 12:07), and 'login.html' (316 bytes, Microsoft Edge, 06-03-2025 11:03). The bottom status bar shows 'Local selection: 1 file (412 bytes); Remote selection: 1 file (615 bytes)'. The system tray at the bottom indicates a temperature of 28°C, Haze, and the time 12:29 on 06-03-2025.

12. Now go back to the 'AWS Window' and copy the 'IPv4 address'.

13. In a new window paste the 'IPv4 address'.
